

Layout Exercises

Exercise time: 30 minutes

Welcome Screen

Build the welcome screen of the app.

- Use the background image and logo I've supplied in this lesson. Add these images in the **/assets** folder.
- Implement the background using the **ImageBackground** component in React Native. Read the docs on <https://reactnative.dev> to learn how to use it.
- The red and green rectangles below the image are placeholders for the LOGIN and REGISTER buttons which we will implement in the next section.
- Colors: red (**#fc5c65**), green (**#4ecdc4**)
- Component's name: **WelcomeScreen**
- Path: **/screens** folder

View Image Screen

Build the screen for viewing an image

- The red box is a placeholder for the close icon. We'll add in the next section.
- The green box is a placeholder for the delete icon. We'll add in the next section.
- For the image, set **resizeMode** to **contain** so the entire image is visible on the screen.
- Component's name: **ViewImageScreen**
- Path: **/screens** folder
